BAD DESIGN :

- 1.Text and images are not aligned properly and look randomly placed.
- 2.Too many different font styles, sizes, and colors are used.
- 3.The text is hard to read because the colors don't contrast well with the background.
- 4.Important details like item names and prices are not clearly highlighted.
- 5.Images are of different sizes and make the layout look cluttered.

GOOD DESIGN :

- 1.All items are neatly aligned, making the layout clean and organized.
- 2.The same font style and color are used throughout, giving a consistent look.
- 3.Text is clearly readable because there is good contrast with the background.
- 4.Item names and prices are placed logically, so information is easy to understand.
- 5.Images are evenly sized and properly spaced, making the design balanced and attractive.
